

Alliance Statement on Vaccination

The Alliance for Public Waldorf Education was formed to support public schools seeking to implement principles of Public Waldorf education. Our member schools are public institutions and are required to follow all relevant local, state, and federal laws. The Alliance does not take a position on legal or political issues, including vaccination or any authorized exemptions; nor does the Alliance engage in any political activity in relation to legislation relating to vaccination requirements and exemptions or other matters. To the extent that parental choice is authorized by law, our member schools must honor those laws and follow all regulations and requirements for documentation of exemptions.

This statement in relation to the question of vaccination has been provided to all Alliance member schools.
